Esthetic Color Training In Dentistry, 1e

Synopsis

This book/CD-ROM helps users master the art of color selection to achieve the best esthetic results in dental procedures, such as those related to cosmetic dentistry, restorative dentistry, and prosthodontics. It covers everyday dental techniques that require the dentist to precisely match dental materials to patients' teeth. The book's nine easy-to-read chapters serve as a basis for color training - from colorimetry and the properties of natural teeth, to the specifics of color perception and reproduction of color. The accompanying CD-ROM uses interactive color-block exercises to train and test users on discerning lightness, hue, and chroma changes, as well as total color differences. Short, easy-to-read chapters present only the most important concepts of each topic, allowing for quick completion and comprehension. The newest techniques in esthetic dentistry are presented, with implications for the future of each topic. Full-color, high-quality art program serves as an instrumental tool in learning about color and shading, providing color images for reference. A total of 31 expert contributors from a variety of dental schools lend their experience and knowledge of color and dental materials, ensuring accuracy of all material. Interactive "drag-and-drop" exercises on CD-ROM sharpen users' color-matching skills by challenging them to arrange color blocks. CD-ROM exercises are logically ordered from least complex to most difficult, so that as users master topics, the next exercises expand upon concepts and challenge users to recall concepts and techniques. CD-ROM exercises can be performed multiple times for unlimited practice.
