## Customer Reviews

I purchased this book a few semesters ago and it is a great text book. This text book you will want to keep for future references. With that said.. Do yourself a favour and just get the past edition. I returned my 9th edition. I just do not see the justification to charge someone almost \$200 for a new

book when the previous edition is almost the exact same, with just replacing of pictures. The 8th Edition can be purchased for less than \$15 bucks here on (ISBN-10: 0805395695 ). I am pretty certain that most college students are pretty much on the verge of being broke, or soon to be for that matter. Always try to get the previous edition if you can, you save a lot of money, around 1/5 the price. These publishers just drive me nuts, I understand they need to make money, but come on, most of these books are never completely rewritten and they come out with a new edition every 2-3 years and those editions like this one, are almost exactly the same, except for replacement of pictures and a few updated stories/examples. It seems crazy how a book that is just two years old seems to be considered no longer usable.--\*Update\*: For most A&P students, you cover the first chapter all the way to the nervous system. In A&P II you probably start with the Endocrine System. Your professor may require you to get Mastering A & P. This requires that you use an on-line website that allows you to take some tests, quizzes and other exams. Getting the older book, will save you money, so you will be able to purchase the other software. The access code is \$55, if you want the eText/eBook included, then it is \$110 and that will include the 9th edition. The My Mastering A & P website, is good for 1 year.
