Textbook Of Histology, 4e

Synopsis

Thoroughly updated to reflect all of the latest concepts and advances in the field, this concise, extensively illustrated text presents the basic science and clinical application of cellular and molecular biology. Functioning as a combined text and atlas, it is essentially two books for the price of one providing a comprehensive, visually engaging histology education from the ground up. Illustrations, tables, PowerPoint[®] presentations, chapter summaries and multiple choice questions facilitate comprehension of concepts, and clinical correlations underscore the practical relevance of the material. Superb illustrations including photomicrographs, electron micrographs, schematic diagrams and drawings provide a visual grasp and easier retention of difficult concepts. Online PowerPoint[®] slides, prepared by the author, offer a convenient way to review the most essential information from the text. Clinical correlations throughout the text demonstrate clinical applications and reinforce the idea that histology is pertinent not only to pathology and physiology, but in fact comprises one of the essential bases of clinical practice. New! "Pathological Considerations" section at the end of each chapter. Helpful tables provide an at-a-glance summary statement of key points. Bolded key terms, bulleted lists and chapter summaries emphasize the "need to know" information in every chapter. A combination of USMLE-style questions and image based questions in each chapter. Student Consult eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, and references from the book on a variety of devices.

Book Information

Paperback: 672 pages

Publisher: Elsevier; 4 edition (January 20, 2016)

Language: English

ISBN-10: 0323355633

ISBN-13: 978-0323355636

Product Dimensions: 8 x 1.1 x 10 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars See all reviews (1 customer review)
